DETAILED ACTION

The declaration filed on 08/22/2006 under 37 CFR 1.131 has been considered and entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-325 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Where, in view of the nature and scope of applicant's invention, applicant presents an unreasonable number of claims which are repetitious and multiplied, the net result of which is to confuse rather than to clarify, a rejection on undue multiplicity based on 35 U.S.C. 112, second paragraph, may be appropriate. As noted by the court in *In re Chandler*, 319 F.2d 211, 225, 138 USPQ 138, 148 (CCPA 1963), "applicants should be allowed reasonable latitude in stating their claims in regard to number and phraseology employed. The right of applicants to freedom of choice in selecting phraseology which truly points out and defines their inventions should not be abridged. Such latitude, however, should not be extended to sanction that degree of repetition and multiplicity which beclouds definition in a maze of confusion. The rule of reason should be practiced and applied on the basis of the relevant facts and circumstances in each

individual case." See also *In re Flint*, 411 F.2d 1353, 1357, 162 USPQ 228, 231 (CCPA 1969).

Taken as a whole, the claims recite an undue multiplicity of claims by virtue of the unreasonable number of claims presented would tend to obfuscate, confuse, and becloud the claimed invention. Because the examiner believes that in his judgment that forty (40) claims are sufficient to properly define Applicant's invention, Applicant's are required to select certain claims, not to exceed forty for examination on the merits, See M.P.E.P. 2173.05(n). To be complete the non-selected claims must be cancelled or the Applicant must present appropriate arguments as to why the above rejection is in error. Note most patents have less than forty (40) claims.

It is further noted that it would appear that a multiplicity of inventions also appear to be involved and the Applicant's are requested to group their selection accordingly to read on a single invention. The Applicant should group the claims according to what he believes to be distinct inventions which may be restricted in a subsequent action.

Applicant's are being afforded the courtesy of a written response due to the complexity of the case.
